

## IOBC/WPRS Bulletin

### Vol. 22(3) 1999

Study Group "Integrated protection in oak forests". Proceedings of the Meeting at Rabat-Salé (Maroc), 26-29 October 1998. XII +198 pp.

Edited by: C. Villemant. ISBN 92-9067-107-6.

Main aspects of cork oak decline in Sardinia.

A. Franceschini, P. Corda, L. Maddau, C. Sechi & P. Angelo Ruiu .....	1
Observations on <i>Diplodia mutila</i> , cork oak pathogen in Sardinia. A. Franceschini, P. Corda, L. Maddau & F. Marras.....	5
Contribution to the ultrastructural study of <i>Diplodia mutila</i> (Fri.) Mont. implicated in the decline process of the cork oak <i>Quercus suber</i> L. in Morocco. N. El Badri & M. Abadie .....	13
Screening of different cork oak origins to the pathogen <i>Diplodia mutila</i> . M. Bakry, H. Sbay, Mohamed Abourouh & Badr Satrani .....	19
Mycoflora associated with cork oak ( <i>Quercus suber</i> L.) in Portugal. M.N. Santos, M.H. Machado, M.H. Bragança, H. Ramos, E. de Sousa & I. Tomaz.....	25
Cork oak acorns and their pathogenous fungi: attempts of conservation and control. A. Khaldi, M.L. Ben Jamaâ & B. Stiti.....	29
Biotic factors inducing tree decline in Moroccan cork oak forests. M. Bakry, S. El Antry, B. Satrani & W. Oubrou .....	37
Damage importance and species identification of the cockchafer grubs attacking cork oak seedlings in the Mamora forest (Morocco). S. Rachdi & M. Haddan.....	41
Spatio-temporal distribution of <i>Platypus cylindrus</i> F. (Coleoptera: Platypodidae) attacks in cork oak stands in Portugal. E.M. R. De Sousa & D. Debouzie .....	47
Biology and damage of <i>Cerambyx cerdo mirbecki</i> Lucas (Coleoptera, Cerambycidae) in the Mamora cork oak forest (Morocco). S. El Antry .....	59
Defoliator insects of <i>Quercus callyprinos</i> Webb. and <i>Quercus infectoria</i> Oliv. in Lebanon. G. Démolin & N. Nemer .....	65
Gypsy moth gradations in Europe and North Africa. C. Villemant & A. Fraval .....	71
Ecological statute of the gypsy moth, <i>Lymantria dispar</i> (Lep. Lymantriidae) in Atlantic Moroccan cork oak forests. H. Ramzi .....	81
Gypsy moth development on foliage of several oaks in Sardinia. P. Luciano, A. Lentini, C. Dettori, V. Solinas & G. S. Passino.....	89
Suitability of two oak species, <i>Quercus petraea</i> and <i>Q. cerris</i> , for development and growth of gypsy moth larvae. A. Schopf, G. Hoch, A. Klaus & C. Schafellner.....	95
The diapause of gypsy moth, <i>Lymantria dispar</i> (L.) (Lepidoptera: Lymantriidae). N. Benhsain & Z. Atay-Kadiri.....	101
<i>Citrullus colocynthis</i> (L.) extract effect on gypsy moth, <i>Lymantria dispar</i> (L.) (Lepidoptera: Lymantriidae). N. Benhsain & Z. Atay-Kadiri.....	107
Effects of <i>Bacillus thuringiensis</i> and defoliation by gypsy moth on lepidopterous fauna in cork-oak forests. P. Luciano & A. Lentini.....	115

The gypsy moth and its natural enemies at different population densities in the oak forests of Eastern Austria. G. Hoch, T. Gschwantner & A. Schopf .....	121
Population density and parasitism rate of <i>Lymantria dispar</i> L. (Lepidoptera: Lymantriidae) during a five-years survey in a Sardinian cork oak forest. A. Cerboneschi .....	129
In vitro rearing of <i>Exorista larvarum</i> (L.) and <i>Brachymeria intermedia</i> (Nees), parasitoids of cork oak defoliators. R. Farneti & M. L. Dindo.....	137
Possibilities for classical biological control against forest pests through collaborative programs between Europe and North Africa. M. Kenis .....	145
Biodiversity of Ichneumonoidea (Hymenoptera) in the green oak forest of Fango (Corsica). M-C. Andrei -Ruiz & C. Villemant .....	151
The spiders of the Moroccan cork oak forests. S. Benhalima, C. Villemant & M. Mouna.....	157
Refuse impact of the cork oak forest at Ben Slimane (Morocco). F. Agtay .....	163
Impact of decline factors, socio-economic environment and forest planning on Moroccan oak forests. M. Bendaanoun .....	167
Protection strategy of the Mamora cork oak forest. M. El Yousfi.....	175
Sylvo-pastoral planning: a device for the sustainable development of the forest resources. M. Naggar .....	181
Patrimonial interest of temporary pools in the cork oak forests: the left and right banks of the oued Cherrat. D. Titolet & L. Rhazi .....	189
Conclusions and recommandations.....	195
