Multitrophic Interactions in Soils

Convenor : C. Steinberg (INRA Dijon, F.)
Liaison Officer : Y. Elad (ARO, The Volcani Center, I.)

IOBC-WPRS
OILB-SROP

Soil :

=> a complex environment,

=> a reservoir of biodiversity

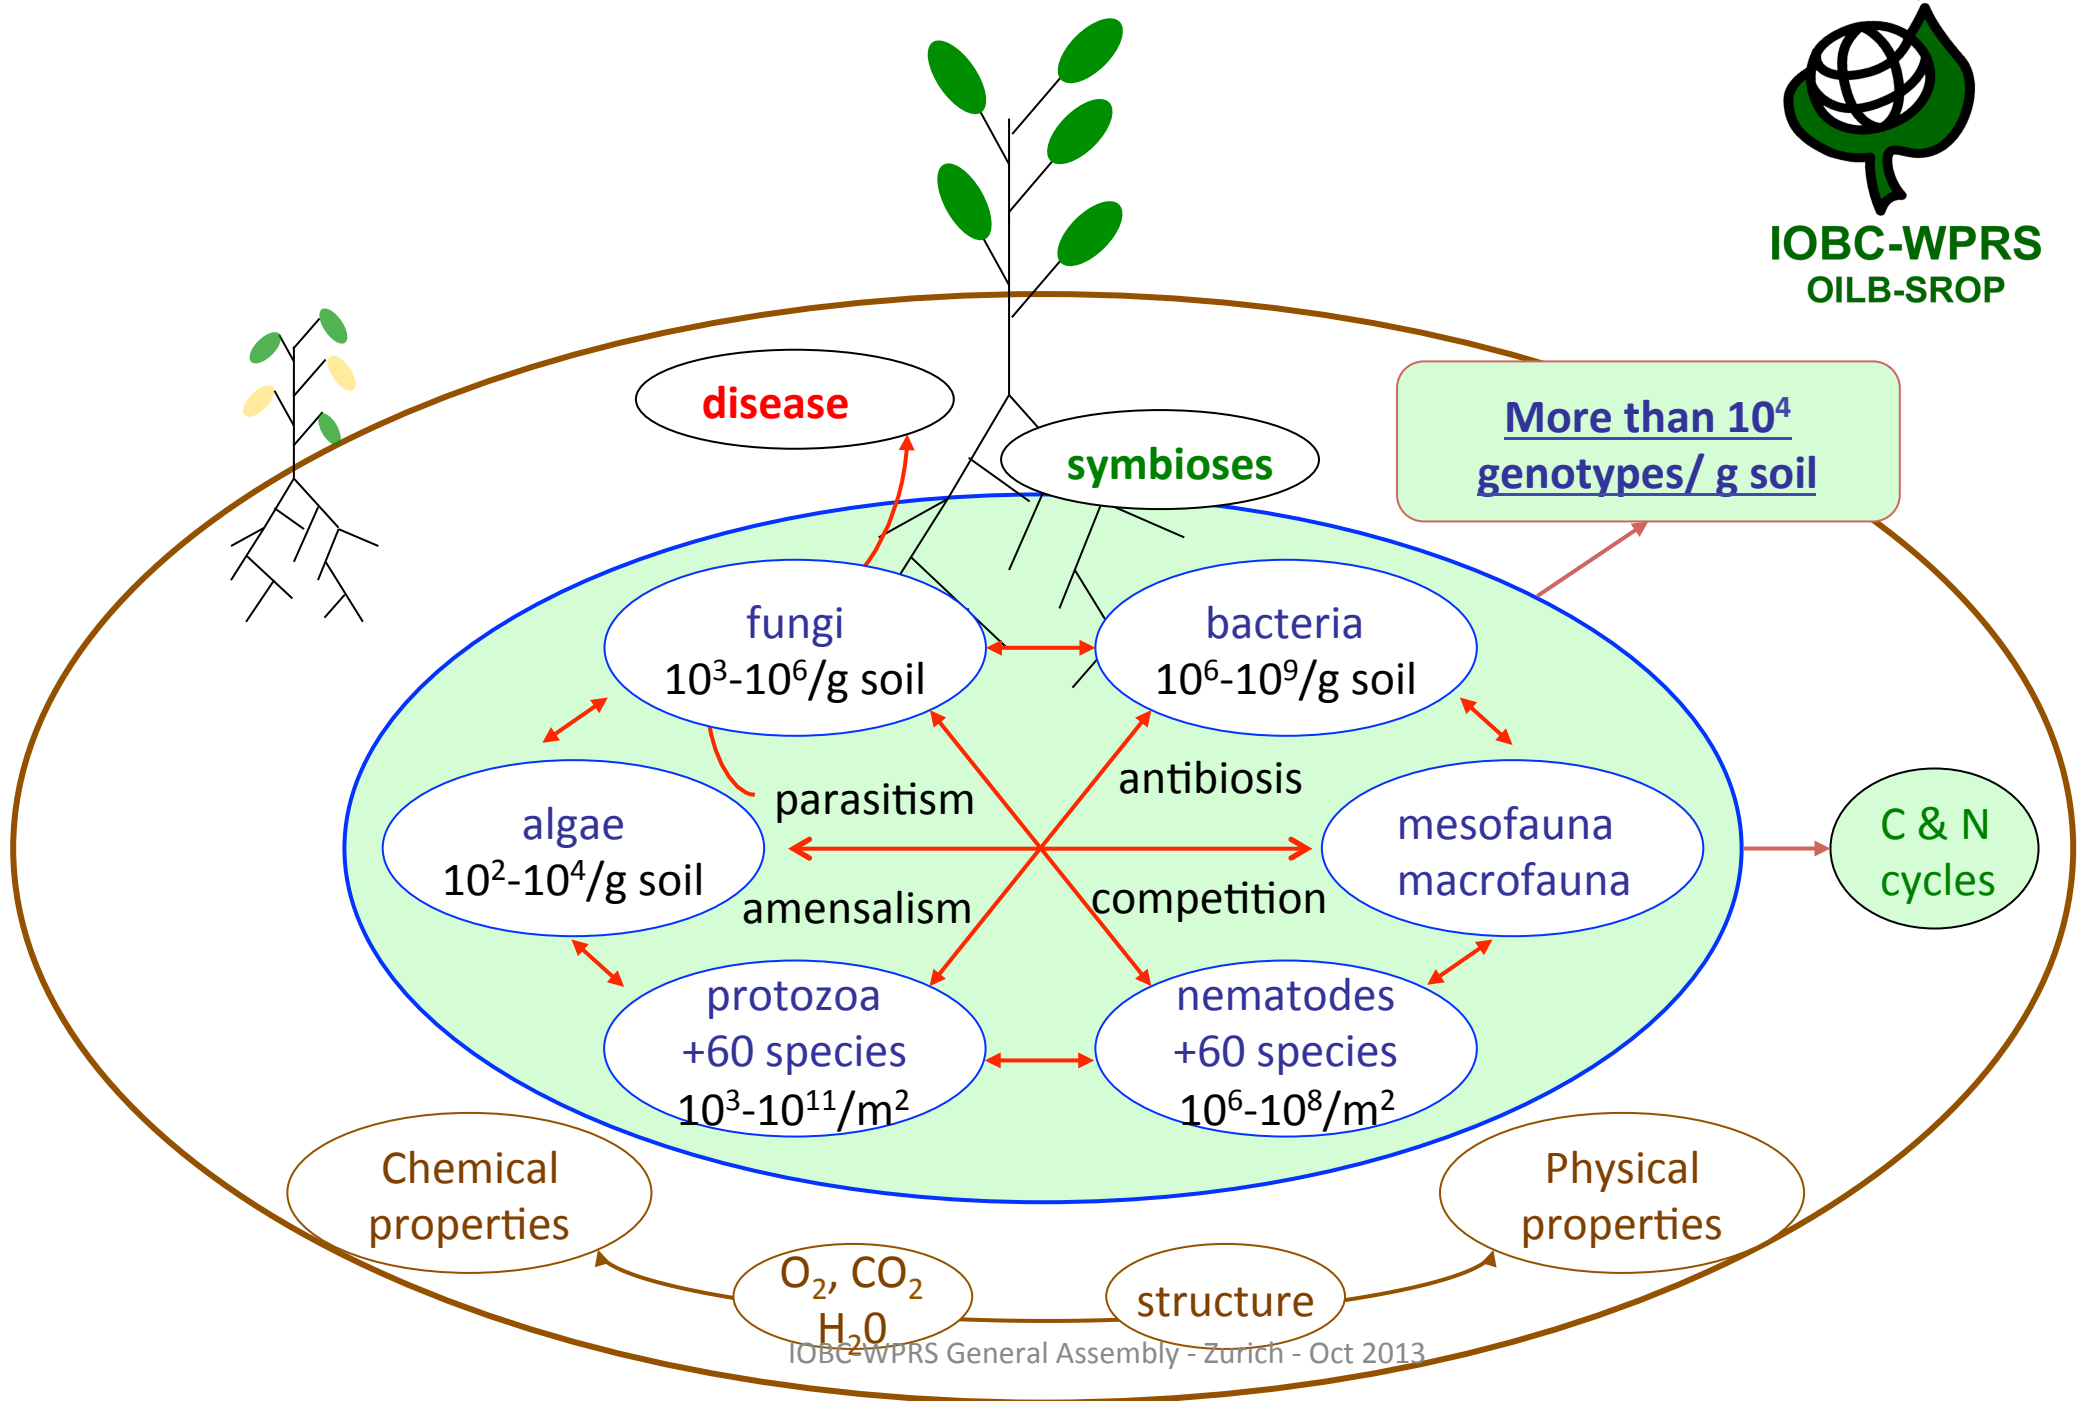

=> the seat of multitrophic interactions responsible for

- completion of biogeochemical cycles,
- environmental sustainability,
- plant health and crop production

Hence the interest to know these interactions and to promote those which are favorable to biological control of pest and disease .

Because of successive withdrawals of local organizers, the 7th meeting of the WG originally scheduled for October 2013 (only 10 preregistered participants in Sept.) was postponed in April 2015

It will be held
at Wageningen (<http://www.wageningenur.nl/en/show/Living-Soils.htm>)
and organized by Bart HEIJNE

with a specific focus on soil fauna-soil microorganism interactions
